**MeasurLink** ENABLED  
Data Management Software by Mitutoyo

The DP-1VA collects data from a Digimatic gage, which can be stored, exported to software or printed.

SMALL TOOL INSTRUMENTS AND DATA MANAGEMENT

**Store. Send. Print.**

USB connection allows collected data to be easily transferred from the DP-1VA to the PC. The output is HID or VCP so data can be sent directly to Excel or data collection software such as IT-Pak or MeasurLink.

Digimatic 2 function allows the high resolution of the gage to be output in its entirety in metric or inch.

## DP-1VA Data Collection

- A gage with SPC output is connected to the DP-1VA with an SPC cable.
- The data for each part measured is printed or sent directly to a PC through a USB cable.
- This data can be triggered by the button on the gage, cable or the DP-1VA. The footswitch can also be used.

### Data Logger:

- Data can be stored internally or printed.
- Up to 1,000 measurements can be stored.

### Timer:

- Data collection can be triggered by a timer function. The DP-1VA can collect data unattended to measure changes over time.

### Tolerance and SPC:

- Tolerances can be set in the unit and statistics can be calculated and printed directly from the DP-1VA.
- No additional software is required.
